завод полимерных изделий

# TINGERPLAST COMPANY:

**DESIGNING AND MANUFACTURING**  
of high-quality products of any  
complexity from  
environmentally-friendly materials

**10**

Years of successful work  
in rotary moulding

**2 500**

Annual output is 2500 tons  
of products

**100**

100 representatives all over  
the Russian Federation

**150**

150 employees of our  
company

## ROTARY MOULDING

Manufacturing of plastic products is a quite expensive process with a lot of technical difficulties to be handled. However, there is a good solution. Rotary Moulding is a quite simple technological method of processing the plastics.

Rotary Moulding has some advantages as compared to the alternatives. The rotary moulding process is relatively simple and may be effectively managed that allows to manufacture the high quality products with the consumer required properties at the competitive price. The method of rotary moulding is based on rotation of a specially designed mould in heating chamber.

# THE SEAMLESS PLASTIC CELLAR TINGARD

## DESCRIPTION

1. The "Tingard" cellar is made out of high density and environmentally friendly food polyethylene (HDPE). The "Tingard" cellar lifetime is more than 100 years.
